END OF REPORT; NO FURTHER INFORMATION

9 MAY 1951

2. KOSABATY further informed the Father that he, there his friends in France and North Africa, had taken all necessary steps to be informed immediately upon KOSYUCHENKO's re-appearance. KOSABATY further expressed his hope that KOSYUCHENKO would reappear soon and that he would make it possible to interrogate KOSYUCHENKO in detail in the near future.

KOSABATY stated - and this statement is corroborated by a number of similar statements from other sources - that keen competition exists among the different Russian emigrant and political groups in the West for every single defector.

4. KOSYUCHENKO, without giving details, had mentioned in addition to the report already submitted on 25 April 1951 the following aviation installations:
see-plane part between KISOVA (KISOVE), 106 East, 32 North;
airbase STUNOVA, 3 km East MOPKI PAVLOVIC, 122 East, 34 North; and
bomber station in a valley 4km from MOPKI, 120 East, 34 North.

Above named red airforce installations, together with the one reported on in detail, allegedly belong to the same Division and are headed by a Major General. The hangars of all these stations (allegedly also both of the see-plane part) are underground in mountain sides, and the distance from hangar door to door in all instances was allegedly 7500 meters. The engineer (deputy) units are the battalions 6 to 11.
